

# MOBILE SATELLITE LINKING

## ANYWHERE, ANYTIME.

Combining leading edge portable technology with extensive up-linking expertise, our team is on call to set up Kordia™'s mobile satellite up-linking equipment anywhere, at anytime.

Whether you're covering current affairs or sporting events, our well-trained team bring relevant experience to ensure your unhindered broadcast coverage.

Our core market remains within the high-profile sporting arena. We've been successfully providing broadcast solutions for international rugby, soccer and cricket events for years; a capability that has imparted a substantial level of industry knowledge. We'll draw on that industry expertise when delivering a mobile satellite up-linking solution to your next event.

We also operate New Zealand's Parliamentary TV. We will be utilising our mobile satellite up-linking equipment to help deliver coverage of any remote select committees to the viewing public.

Whether we're working in Parliament or New Zealand's snow storms, searing heat in East Timor or tropical storms in PNG, our ability to successfully deliver quality satellite up-linking is proven.

**FROM RIOTS TO RUGBY**

Our people have covered extensive news and sporting events throughout South Pacific, Asia, Australia, New Zealand and Europe including:

- Riots in Tonga and military coup in Fiji
- Shootings in East Timor
- Rugby World Cup in France

OUR TEAM HAS SUPPLIED SERVICES FOR:

- TF 1 France
- ITV UK
- APTN
- Reuters
- Al Jazeera
- CNN
- Nearly all major networks in Australia and New Zealand

**NEWS WAITS FOR NO MAN**

When a globally significant event happens, you need to get their fast. Time is of the essence and every minute counts. And when the terrain hinders speedy access, portability is vital.

Mobile satellite up-linking equipment, and the expertise to connect without error, can make the difference between the quality and conveyance of your broadcast coverage—and the competition's.

**COMPACT. LIGHTWEIGHT. MOBILE.**

Kordia™s carbon fibre mobile satellite up-linking equipment is among the most lightweight in the world. Able to be configured into IATA compliant cases, each weighs less than 32-kgs and can be transported as accompanied baggage on both international and domestic airlines—or via helicopter heading into remote territory.

**CUSTOMISED UP-LINK EQUIPMENT**

Tailoring up-link equipment to meet your specific needs, Kordia™s Advent 1.9-metre Mantas Flyaways can be configured:

- Fully redundant or single thread
- As Standard Definition or High Definition
- Main Profile 4.2.0 or 4.2.2
- Advent or Tandberg Encoders available DVBS or DVBS2 modulation, and we can handle all standard modulation schemes

Kits come with Ku band as standard but, with prior warning, C band Circular or Linear are also available.

WITH ITS OWN AUSTRALASIAN SATELLITE SPACE, KORDIA™ CAN ALSO ACCESS:

- Intelsat (PANAMSAT)
- SES-Newskies
- ASIASAT
- GE23

**ABOUT KORDIA™**

Kordia™ is an experienced trans-Tasman business that is fast-becoming one of the region's leading providers of customised broadcast and telecommunications networks, network services and converged solutions.

Kordia™ operates and maintains an impressive network of transmission infrastructure across New Zealand and Australia, delivering television and radio programming to most homes across both countries.

Kordia™ also provides services to a range of other broadcasters throughout the Australasian, Pacific and Asian regions.

The enduring quality and reliability of our network services are testament to our engineering skills and our passion for excellence.
